Senior officer, CGIAR* System Organization

Research coordinator, JIRCAS

Associate professor, University of Tsukuba

Date: Jan.11 (Thur.) 13:30-15:00

Place: Central Library (Meeting Room)

Facilitator: Hisayoshi HAYASHI

Biosphere Resource Science and Technology

Abstract :

Global food security faces a number of challenges cross both production and consumption which research will be essential to solve. As demonstrated over the past several decades, the investment in agricultural research has led substantial benefit in the improvement of crop productivity and economic growth, and the expectation to agricultural research is getting higher.

This seminar will introduce the contribution of CGIAR to Global food security, as world largest agricultural research network, through their activities advancing agricultural sciences and technologies. Also, during the seminar, the suggestions for preferable skills to work in the system, based on the speaker's experiences, will be shared.
